### **Education**

---

Southern Connecticut State University - January 2010 – May 2015 - B.A., Public Health

University of Connecticut – July 2020 – January 2021 – Certificate, Software Development

### **Projects**

---

#### **Daily Task Planner: HTML, CSS, Javascript, Bulma, APIs**

Myself and my team built a daily task planner to help people organize their day-to-day tasks. Users can drag a task from one view to another, users can enter tasks from a daily, monthly and weekly view. You can also see the weather forecast per day along with an inspirational quote!

#### **Portfolio: HTML, CSS, Bootstrap**

I built a dynamic portfolio to showcase my coding bootcamp skills and projects.

#### **Weather App: HTML, CSS, Bootstrap, Javascript, APIs**

A great weather app that allows you to search for the weather forecast in any city. You can see the temperature, humidity, wind speed and the five-day weather forecast.

#### **Virtual Closet App: HTML, CSS, Javascript, Express, Handlebars, Bootstrap, Heroku, Sequelize, Cloudinary, Passport, Bcrypt**

Virtual Closet provides the user a seamless fashion experience. With the Virtual Closet, you have the ability to upload your own styles and curate an entire outfit with the click of a button.

### **Skills**

---

HTML, CSS, Javascript, Node.js, Git Hub, Git Pages, Visual Studio Code, Bulma, Bootstrap, React, Mongo DB, Express, Handlebars, Heroku, Sequelize
